PROFESSIONAL SUMMARY

Final-year BCA student specializing in **Cloud Computing**, **DevOps,** and **applied AI automation**, with hands-on experience in AWS, Docker,Kubernetes, Jenkins, GitHub Actions, and Ansible. Skilled in leveraging AI tools and LLMs to accelerate development workflows, automate documentation, generate infrastructure scripts, and optimize CI/CD pipelines. Actively **builds real-world projects** combining cloud with AI-development productivity, strong in problem-solving, system thinking, and rapid prototyping. Seeking an entry-level DevOps / Cloud / AI-Driven Engineer internship where modern automation and AI-assisted engineering practices are valued.

TECHNICAL & NON-TECHNICAL SKILLS

- **Languages & Core**: Python
- **Database & Cloud**:AWS,Mysql
- **Tools & DevOps**: Git/GitHub Actions, Linux , Docker,Ansible,Jenkins,K8s
- **AI & Security**: Prompt Engineering, AI-Assisted Coding, Vibe Coding,n8n(learning)

PROJECTS

1.End-to-End CI/CD Pipeline | Jenkins, Docker, Kubernetes

- Built a production-style CI/CD pipeline automating build, test, containerization, and Kubernetes deployment
- Implemented rolling updates and self-healing deployments to minimize downtime
- Integrated GitHub webhooks for automated pipeline triggers
- Reduced manual deployment effort by ~90%

Tech Stack: Jenkins, Docker, Kubernetes, Python, GitHub

2.Infrastructure Automation with Ansible

- Automated multi-server provisioning and configuration using Ansible playbooks and roles
- Standardized Docker, Jenkins agent, and Kubernetes prerequisite installation
- Eliminated environment drift and manual configuration errors
- Enabled one-command infrastructure setup

Tech Stack: Ansible, Linux, Docker, Jenkins, Kubernetes

3.Cloud Deployment on AWS

- Deployed a containerized Python application on AWS EC2 using Docker
- Configured IAM roles and basic networking for secure cloud access
- Integrated CI/CD pipeline to automate deployments to AWS
- Enabled scalable and reliable application delivery on cloud infrastructure

Tech Stack: AWS (EC2, IAM), Docker, Jenkins / GitHub Actions, Python, Linux

DEVOPS PRACTICES

- CI/CD Pipelines • Containerization • Infrastructure as Code
- Kubernetes Orchestration • Rolling Updates • Automation Scripting
- Linux Server Management • Git-based Workflows

EDUCATION & CERTIFICATIONS

Bachelor of Computer Applications (BCA)

GLS University, Ahmedabad | 2023 – 2026

Specialization: Cloud Computing & DevOps

- **Cloud & DevOps Certification (Ongoing)**

  Physics Wallah (PW) | June 2025 – Jan 2026
- Comprehensive training in Cloud Computing and DevOps practices
